EDUCATION

- Aug 2023 - Dec 2027(exp) **McGill University**
Montreal, Canada - B.A. Computer Science, Minor Communication Studies
Relevant coursework: Data Science, Algorithms & Data Structures, Software Systems, Computer Systems, C++, Natural Language Processing, Theory of Computation, Software Design, Web Development, and Programming Challenges. Member of Women in Computer Science (McWICS), McHacks Hackathons.
- Sep 2019 - Jun 2023 **Dwight School**
New York, NY - Full IB Diploma, Computer Science and Chemistry
Awards: Excellence in the Study of IB Computer Science, and English Language/Literature; Dwight's Spark Tank prototype award for app development (Promptl). Honor Roll.

EXPERIENCE

- Jun 2026 - Aug 2026 **Technology Summer Analyst - Application Development**
Citibank - New York, NY
Built a Python-based AI-assisted configuration analysis tool using Google Gemini Flash to detect, classify, and track changes across nine file types. Designed a rules-based classification framework to identify saved preferences, categorize changes by severity, and flag high-priority anomalies based on user-defined criteria. Transformed raw configuration differences into structured, actionable insights, reducing manual analysis and supporting a broader intelligent automation initiative.
- Jul 2025 - Aug 2025 **Data Analyst Intern**
Definite Articles - New York, NY
Developed competitive analysis framework to evaluate five athletic wear brands across e-commerce and multi-channel companies. Built two Tableau dashboards for data and trend visualization; incorporated TF-IDF to identify popular product features; and optimized SEO by refining product descriptions to increase visibility across various search and AI platforms. Analyzed category sentiment and engagement across Twitter/X and Reddit communities using Python and Beautiful Soup.
- Apr 2022 - current **Founder and Full-Stack Developer**
Promptl (promptl.com)
Developed and launched Promptl, a Python-based creative writing web application, aimed to make writing fun and rewarding for kids with learning differences. Designed randomized story-generation logic and gamified point mechanics in collaboration with special educators.
- Jul 2022 - Aug 2022 **GSTEM Research Intern & Winston Data Scholar in Data Science**
New York University
Participated in a selective and intensive computer science research program with NYU and affiliated faculty. Conducted Python-based task simulations with Prof. Saptarshi Debroy to investigate battery life vulnerabilities arising from external mobile security threats. Analyzed streaming TV content trends using Python and JupyterHub, examining the prevalence of mature content across platforms.

SKILLS & PROJECTS

- **Languages:** Python, SQL, Java, C++, HTML/CSS
- **Data & ML:** Pandas, NumPy, Seaborn, Matplotlib, Beautiful Soup, SciPy, Scikit-learn
- **Tools:** GitHub, VS Code, JupyterHub, Bash, AWS, Tableau, Jira, MS Office, Google Suite
- **AI Tools:** Claude Code, Google Gemini
- **Certificates:** Tableau, Excel (Data Analysis)
- **Concepts:** structured/unstructured data, reinforcement learning, UNIX/Linux, web development, UI/UX, automation scripting
- **Hackathons:** McHacks hackathon team events
- **Projects:** github.com/zcoder365

LEADERSHIP & ACTIVITIES

- 2020 - 2023 **Girls Who Code (School Club Leader; Summer Immersion Programs).** Led coding club for girls, focused on projects in Python, HTML and CSS.
- 2019 - 2023 **Forming Futures (Product Procurement Manager).** Part of a student-led non-profit serving low income communities in NYC with hygiene/school supplies.
